

BUMBLE BEE ROAD AREA UPDATES

The I-17 Bumble Bee Road traffic interchange will undergo major earthwork, lane additions, and a full bridge replacement in 2024.

- Work days and times may vary. Please visit ImprovingI17.com for up-to-date traffic information.
- **Earthwork** includes excavating and infilling within the steep terrain between the existing northbound and southbound lanes of I-17, and slight realignment of Bumble Bee Road west of I-17.
- **Lane additions** involve converting the 2 southbound lanes into brand-new flex lanes, and relocating the 2 dedicated southbound lanes to the west of their current path.
- **The Bumble Bee Road bridge must be replaced** to accommodate additional lanes on I-17.
- Flaggers and signage will continue to guide traffic at the Bumble Bee Road traffic interchange. Additional traffic restrictions will be implemented as needed, and the communities of Bumble Bee, Cleator, and Crown King will be notified in advance.
- Emergency vehicle access will be maintained through the work zone.
- Work is underway and expected to continue **through late 2024**.
